DETAILED ACTION

Applicants' Amendment, filed 6/21/04 has been considered and entered.

Claims 2 and 13 have been cancelled. Claims 1, 3, 4, 11, 12, 14-17 have been amended. Claims 1, 3-12 and 14-17 are pending and under current examination.

Claim Objections

Claims 1, 3-10 and 17 are objected to because of the following:

The method steps of the independent claims (claims 1 and 17) are not clear and consistent with the preamble. In particular, the claims do not recite a step of allowing the primary human leukemia cells to engraft in the mouse to produce an *in vivo* model of human leukemia after step (c) of the claims, such that the method steps would relate to the preamble, "A process for making an *in vivo* model of human leukemia."

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The prior rejection of claims 10-12 and 14-16 under 35 U.S.C. 102(b) as being anticipated by Yu *et al.* is maintained for reasons of record.

Applicants argue that Yu is not an enabling disclosure of the invention claimed because they do not teach the pre-conditioning amount of mononuclear cells derived from human fetal cord blood, that the preconditioned mouse is maintained for 5-10 days, and the effective engrafting amount of primary human leukemia cells.

This is not found to be persuasive. Yu fulfill the limitations of the claims because they teach each and every element of the claims. There is no requirement in the claims for the pre-conditioning amount of mononuclear cells, that the mouse is maintained for 5-10 days, or the effective engrafting amount of primary human leukemia cells set for the in claim 10-12 and 14-16.

With regard to claim 10, this is a product-by-process claim. Where, as here, the claimed and prior art products are identical or substantially identical, or are produced by identical or substantially identical processes, the PTO can require an applicant to prove that the prior art products do not necessarily or inherently possess the characteristics of his claimed product. See *In re Ludtke*, supra. Whether the rejection is based on "inherency" under 35 USC 102, on "prima facie obviousness" under 35 USC 103, jointly or alternatively, the burden of proof is the same, and its fairness is evidenced by the PTO's inability to manufacture products or to obtain and compare prior art products. *In re Best*, Bolton, and Shaw, 195 USPQ 430, 433 (CCPA 1977) citing *In re Brown*, 59 CCPA 1036, 459 F.2d 531, 173

USPQ 685 (1972). Further, see MPEP §2113, "Even though product-by process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process."

Yu teaches the sub-lethal irradiation, pre-conditioning of immunodeficient NOD/scid mice with fetal cord blood mononuclear cells, and the subsequent engraftment of human T-ALL [T-cell acute lymphoblastic leukemia] cells. It was found that cells that were recovered from the mouse bone marrow and spleen resembled the original patient's cells.

Accordingly, Yu anticipate the claimed invention.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
